

**Spring Hill School District**  
**OPTIONAL REQUEST FORM**  
**Off-Network Content Filtering**

Internet access at school is provided through the district's network, which has a content filter that attempts to limit access to inappropriate websites. Content filters are not foolproof and the district cannot guarantee that the filter will always deny access to inappropriate content. Computers provided to students will **not** have this filter capability away from school unless a parent specifically requests it be added. Instead, parents remain responsible for establishing standards for Internet access and use at home.

By submitting this completed form, you are requesting the district install filter software on the laptop computer provided to your child that will redirect off-network Internet access through the filter used by the district's network. Installing this software may restrict a student from accessing some social networking, media streaming, and other Internet services.

**Student Name:** \_\_\_\_\_ **Grade:** \_\_\_\_\_

I understand the limitations of Internet filtering software and my responsibility in monitoring my student's Internet access, and request that the district install this software on the district-owned laptop loaned to my student.

**Parent Signature:** \_\_\_\_\_ **Date:** \_\_\_\_\_
